	CASES	PER 100,000 PEOPLE	DEATHS	PER 100,000 PEOPLE	<div><div>SLOWER</div><div>CASE GROWTH RATE</div><div>FASTER</div></div>
Arizona	1,413	20.3	29	0.4	<div><div>Feb. 25</div><div>Mar. 30</div></div>
Maricopa	871	20.5	8	0.2	
Pima	217	21.3	10	1.0	

Navajo	102	93.8	0	0.0	
Coconino	85	60.6	3	2.1	
Pinal	65	15.5	0	0.0	
Yavapai	24	10.7	0	0.0	
Apache	17	23.8	0	0.0	
Yuma	12	5.8	0	0.0	
Mohave	7	3.4	0	0.0	
Cochise	4	3.2	0	0.0	
Santa Cruz	3	6.4	0	0.0	
Graham	2	5.3	0	0.0	
La Paz	2	9.7	0	0.0	
Gila	1	1.9	0	0.0	
Greenlee	1	10.5	0	0.0	

Notes: Growth rate shows how frequently the number of cases has doubled over the past week. Growth rate not shown for counties with less than 20 cases.

Current statewide order in Arizona

Stay at home, effective March 31 at 5 p.m. Gov. Doug Ducey said he issued the order at the recommendation of health officials. "I'm grateful to everyone making adjustments to fight this virus and protect others," he said. "We need to keep these efforts up."

What You Can Do

Experts' understanding of how the virus spreads is still limited, but there are four factors that most likely play a role: how close you get; how long you are near the person; whether that person projects viral droplets on you; and how much you touch your face.

If your community is affected, you can help reduce your risk and do your part to protect others by following some basic steps:

- **Wash your hands!** Scrub with soap and water for at least 20 seconds, and then dry them with a clean towel or let them air dry.
- **Keep distance from sick people.** Try to stay six feet away from anybody showing flu- or cold-like symptoms, and don't go to work if you're sick.
- **Prepare your family, and communicate your plan about evacuations, resources and supplies.** Experts suggest stocking at least a 30-day supply of any needed prescriptions. Consider doing the same for food staples, laundry detergent and diapers, if you have small children.

Here's a complete guide on how you can prepare for the coronavirus outbreak.

Note: Data are based on reports by states and counties at the time of publication. Local governments may revise reported numbers as they get new information. Read more about this data here. While the first known case in the United States was announced on Jan. 21, charts show cases since Feb. 26, when American public health officials first identified community transmission of the virus.

*Cases in New York City and Kansas City, Mo., both of which span several counties, are grouped together. Cases in a state that have been reported without a specific county are listed as county “unknown.”

Population data from Census Bureau.
