

# Tracking the novel coronavirus in the U.S.

At least **53,541 cases** of the highly contagious novel coronavirus have been reported in the United States and its territories, according to a Reuters tally of state and local government sources. The U.S. diagnosed its first COVID-19 case in Washington state on Jan. 20.

COVID-19 CASES AS OF MARCH 25, 2020, 1:00 AM ET:  
Updated at least twice daily at 2 p.m. and 8 p.m. ET

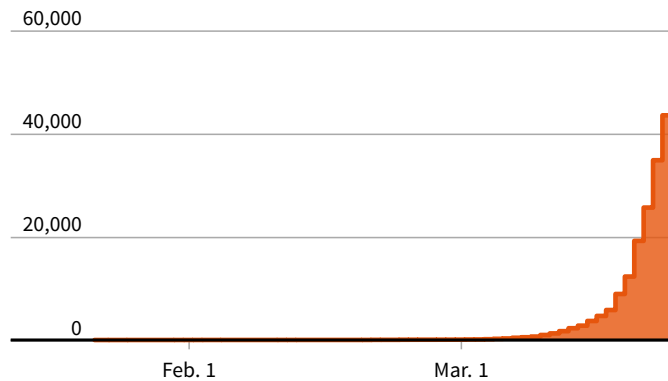

Search for a U.S. county

Note: Statewide totals are shown for Rhode Island as county breakdown is not available. Due to inconsistent reporting from the state, county level breakdowns may not always be available for Nevada and Kentucky. Ranges are shown for some counties in Arkansas and Kentucky as exact figures are not available. Cases in New York City are grouped together, cases in Detroit are included in Wayne County, Michigan and cases in Chicago are included in Cook County, Illinois. The case total for Jackson County, Missouri includes both the county cases and those reported by the Kansas City Health Department as the majority of the city lies within Jackson County. Total cases for Alameda County, California includes data from the city of Berkeley.

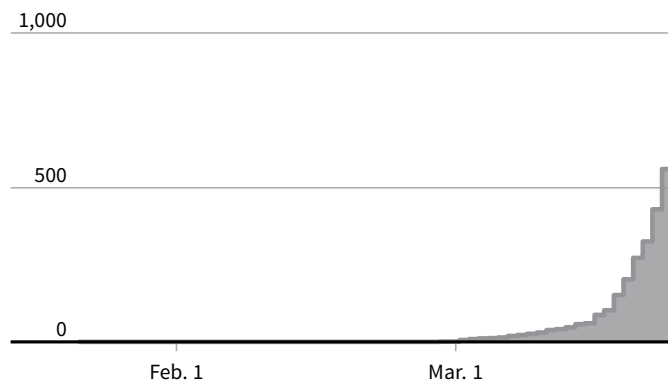

### Cumulative reported COVID-19 cases

Includes confirmed and presumptive cases

At least **730** have died of the illness across the United States, with the largest numbers so far in Washington state, New York and California.

### Cumulative confirmed COVID-19 deaths

### Breakdown by state

American Samoa	0	0

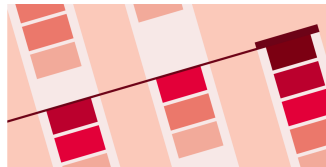

Sources: State and local governments and health authorities; Reuters reporting

About the data: The figures largely come from state, county and territory government/public health department websites. Reuters also occasionally sources information from press conferences, press releases and verified tweets by state officials. While some states and counties report fresh numbers on an ongoing basis, others only update once a day or less frequently. There is no live feed available so Reuters collates and checks this data by hand which could result in a delay in reflecting the latest numbers.
